

## **1. Transfers outside the European Economic Area (EEA)**

We will only transfer your personal data to countries which are considered as providing an adequate level of legal protection or where alternative arrangements are in place to protect your rights.

We may transfer your personal data outside the EEA in the unlikely event that we receive a legal request from a foreign law enforcement body. All requests for information we receive from these bodies will be carefully checked before personal data is transferred.

We may use remote website server hosts to provide and maintain some aspects of our service and website, which may be based outside the EEA (in "the cloud"). Transfers to service providers outside the EEA will be protected by contractual commitments and, where appropriate, further assurances, such as certification schemes (including the EU-US Privacy Shield for the protection of personal data transferred from the EU to the US and accessed in the US).

You have the right to ask for more information about the safeguards we have put in place as mentioned above.
